

AMENDMENTS TO THE CLAIMS

The following is a complete, marked-up listing of claims including the claim amendments proposed by the Examiner. Please note the updated status identifier in parenthesis, underlined text indicating insertions, and strike through and/or double-bracketed text indicating deletions.

Listing of the Claims

1. (Currently Amended) A method for reproducing at least one of external data and internal data of a recording medium, the method comprising:

downloading the external data from an external source, the external data including first audiovisual (AV) data and first enhanced data;

loading the recording medium having the internal data, the internal data including second AV data and second enhanced data;

processing the first and second AV data and the first and second enhanced data ~~included in at least one of the external data and the internal data;~~

setting whether the first and second ~~processed~~ enhanced data is to be reproduced or not based on a command from at least one of a program of the external data, a program of the internal data, and a user;

determining whether at least one of the first AV data, the second AV data, the first enhanced data, and the second enhanced data is to be reproduced; and

reproducing at least one of the first AV data, the second AV data, and the first enhanced data, and the second enhanced data based on the determining step command.

2. (Cancelled)

3. (Cancelled)

4. (Currently Amended) The method of claim 1, wherein the first and second enhanced data is a Java program.

5. (Previously Presented) The method of claim 4, wherein the Java program is executed by a Java module.

6. (Previously Presented) The method of claim 4, wherein the Java program controls a reproduction of the data.

7. (Currently Amended) The method of claim 1, wherein the external data is a digital broadcast signal, and the internal data is a signal reproduced from a read-only blu-ray disc (~~BD-ROM~~).

8. (Currently Amended) The method of claim 5, wherein the java module generates a control command for reproducing at least one of the first and second ~~processed~~ AV data and the first and second enhanced data.

9. – 18. (Cancelled)

19. (Currently Amended) An apparatus for reproducing at least one of external data and internal data of a recording medium, the apparatus comprising:

at least one reproducing engine configured to process first audiovisual (AV) data and first enhanced data included in at least one of the external data and second AV data and second enhanced data included in and the internal data; and

a controller configured to

determine whether the first and second processed enhanced data is to be reproduced or not based on a command from at least one of a program of the external data, a program of the internal data, and a user, and

determine whether at least one of the first AV data, the second AV data, the first enhanced data, and the second enhanced data is to be reproduced.

20. – 25. (Cancelled)

26. (Previously Presented) The apparatus of claim 19, further comprising:

a selection unit configured to select at least one of the external and internal data.

27. (Currently Amended) The apparatus of claim 19, further comprising:

a pre-processing unit configured to adjust a displaying size of the first and second processed AV data and first and second enhanced data.

28. (Currently Amended) The apparatus of claim 19, further comprising:

a Java module configured to control a reproduction of at least one of the first and second AV data and the first and second enhanced data.

29. (Currently Amended) The apparatus of claim 28, wherein the Java module generates a control command to control the reproduction of the first and second ~~processed~~ AV data and first and second enhanced data.

30. (Previously Presented) The apparatus of claim 19, further comprising:
a storage configured to store the external data.

31. (Currently Amended) The apparatus of claim 19, wherein the first and second enhanced data is additional data to be displayed with the first and second AV data.

32. (Currently Amended) The method of claim 1, wherein the first and second enhanced data is additional data to be displayed with the first and second AV data.
